

MUSTAPHA UKIZURU

Full-Stack Software Engineer

mustaphaukizuru@gmail.com | +52 55 4056 2833 | Tlalnepantla de Baz, Estado de Mexico
www.linkedin.com/in/mustaphaukizuru | www.mustaphaukizuru.com | www.github.com/mustaphaukizuru
Work Authorization: Mexico, No Visa Sponsorship Required | Available: Immediately

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with five-plus years of international experience developing, optimizing, and managing web systems and IT infrastructure across Mexico, Ethiopia, and Rwanda. Proven track record of improving application performance by up to 50%, reducing infrastructure downtime by 30%, and driving a 25% revenue increase through clean, well-engineered digital solutions. Proficient in Python, Django, React, PostgreSQL, Docker, GCP, and AWS. Completed a Master's in Strategic Management in Software Engineering (March 2026). Quadrilingual, authorized to work in Mexico immediately.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), Java, SQL, HTML5, CSS3
Frameworks: Django, Flask, React, Spring Boot, Bootstrap
Databases: PostgreSQL, MySQL (schema design, query optimization, indexing)
APIs: RESTful API design, JSON, third-party integrations
DevOps and Tools: Git, GitHub, Docker, JIRA, Linux, Windows
Cloud: Google Cloud Platform (GCP), AWS
Networking: TCP/IP, DNS, DHCP, VPN configuration
Methodologies: Agile/Scrum, CI/CD, OWASP Security, Object-Oriented Design

CORE COMPETENCIES

- **Independent Problem-Solving:** Delivers effective solutions with minimal supervision in complex environments.
- **Cross-Cultural Communication:** Works effectively across diverse teams; fluent in four languages.
- **Leadership & Mentoring:** Leads teams and has mentored 80+ students in software development.
- **Adaptability:** Performs consistently in fast-paced, resource-limited settings.
- **Strategic Thinking:** Combines technical execution with a systems-level perspective.

PROFESSIONAL EXPERIENCE

IT Manager and Full-Stack Developer

Dec 2022 to Present

Colegio de Excelencia Raindrop | Tlalnepantla de Baz, State of Mexico, Mexico

- Built and optimized the school web infrastructure with Python and Google Cloud Platform, delivering a 40% improvement in page load performance and overall website speed for over 100 daily users.
- Led a full network infrastructure upgrade, reducing operational downtime by over 30% and sustaining 99% uptime across TCP/IP, DNS, DHCP, and VPN systems for all campus users.
- Developed internal automation tools and reporting dashboards in Python, Django, and JavaScript, eliminating manual workflows across 12 departments and recovering significant staff hours each week.
- Integrated Google Workspace and LMS platforms into daily academic operations, fully digitalizing instructional and administrative processes for 40 faculty members.
- Mentored 10 students in Python, Java, and web development; coached a project team that reached the XIX InfoMatrix Ibero-American Science and Technology National Finals 2025 (SOLACYT).

Assistant Project Manager, Technical Systems

Sep 2021 to Sep 2022

Design Office of Africa Ltd. | Kigali, Rwanda

- Coordinated technical timelines, task assignments, and delivery milestones across concurrent projects using JIRA, consistently meeting deadlines on time and within scope.
- Managed internal digital systems and IT infrastructure, maintaining 99% uptime and ensuring data integrity across all operational platforms.
- Produced multilingual technical documentation in English, Turkish, and Kinyarwanda, and provided direct IT support to cross-functional stakeholder teams.

ICT Infrastructure Director and Backend Developer

Jan 2021 to Aug 2021

Intellectual Schools AC | Addis Ababa, Ethiopia

- Redesigned the institutional web and backend infrastructure, achieving a 50% improvement in website performance through server-side optimization, database query tuning, and caching strategies.
- Reduced system downtime by 30% through proactive monitoring, automated alerting, and scheduled preventive maintenance across a multi-building campus.
- Supported hybrid e-learning for over 1,000 students and 60 faculty members via Google Workspace and LMS integrations, improving digital tool adoption by 60% in the first quarter.

Software Development Instructor and Curriculum Designer

Jan 2020 to Dec 2020

St. Emmanuel School Complex | Kigali, Rwanda

- Designed and delivered a full-cycle software development curriculum in Python, Java, JavaScript, and web development, guiding students from foundational programming through to application deployment.
- Introduced Git and GitHub version control practices into student workflows, reducing code integration errors by an estimated 35%.

Sales and Marketing Officer, Digital Systems

May 2020 to Dec 2020

Blueflame Ltd. | Kigali, Rwanda

- Generated a 25% increase in company revenue through a data-driven digital marketing strategy combining CRM automation, audience segmentation, and campaign performance analytics.
- Built HTML, CSS, and JavaScript email marketing campaigns that measurably improved customer conversion rates and audience engagement.

Translator and Interpreter

Sep 2018 to May 2020

Umut Ltd. | Kigali, Rwanda

- Provided professional interpretation and document translation services in **Turkish, English, and Kinyarwanda** across business, legal, and diplomatic contexts.

EDUCATION

MSc. Strategic Management in Software Engineering

Jun 2024 to Mar 2026

European University of the Atlantic (UNEATLANTICO) | Spain

Completed March 2026. Key areas: Software Architecture, Web Engineering, Distributed Systems, Database Design, IT Project Management, Business Intelligence, Network Security.

B.Ed. in Information Technology (Minor: Accounting), with Distinction

Sep 2016 to Mar 2021

Adventist University of Central Africa (AUCA) | Kigali, Rwanda

Major GPA: 15.26 / 20. Graduated with Distinction.

Diploma in Turkish Language

Sep 2015 to Aug 2016

Ipek University | Ankara & Istanbul, Turkey

CERTIFICATIONS

- HTML, CSS, and JavaScript for Web Developers, *Johns Hopkins University via Coursera (2023)*
- Introduction to Front-End Development, *Meta via Coursera (2023)*
- HTML and CSS in Depth, *Meta via Coursera (2023)*
- Version Control with Git and GitHub, *Meta via Coursera (2023)*
- Python 101 for Data Science, *IBM Cognitive Class (2020)*
- SQL and Relational Databases 101, *IBM Cognitive Class (2020)*

LANGUAGES

English: C2 Proficient **Spanish:** Intermediate (B2) **Turkish:** Professional (C1) **Kinyarwanda:** Native

RECOGNITION

Project Advisor, XIX InfoMatrix Ibero-American Student Science and Technology Projects, National Finals 2025. Organized by SOLACYT, Ibero-Ciencias, and the University of Ixtlahuaca CUI. Ixtlahuaca de Rayon, Estado de Mexico, May 2025.

MUSTAPHA UKIZURU

Full-Stack Software Engineer

mustaphaukizuru@gmail.com | +52 55 4056 2833 | www.linkedin.com/in/mustaphaukizuru | www.mustaphaukizuru.com

April 15, 2026

Dear Hiring Manager,

When a production system I built sustains 99% uptime for over 100 concurrent users, or when a performance optimization I implemented cuts page load times by 40%, that outcome is the result of engineering choices made weeks earlier with exactly that standard in mind. I am a Full-Stack Software Engineer with five years of experience building and shipping web systems across Mexico, Ethiopia, and Rwanda, and I am looking for a company where delivering results at that level is the baseline, not the exception.

My core strength is in back-end architecture and API development using Python and Django, paired with front-end delivery in React and JavaScript. In my current role at Raindrop College of Excellence in Mexico, I redesigned the full web infrastructure from the ground up, reduced operational downtime by over 30%, and built internal automation tools that eliminated manual workflows across 12 departments. In a previous role in Ethiopia, a backend redesign I led produced a 50% improvement in website performance while cutting downtime by 30%, and supported e-learning adoption for over 1,000 users. Those outcomes were not accidental; they came from writing clean, maintainable code, making sound architectural decisions early, and following through on delivery.

What draws me to Full-Stack Software Engineering roles specifically is the breadth of ownership they require. I am most effective when I can work across the stack, understand the full system, and take responsibility for end-to-end delivery rather than handing work off at a layer boundary. My technical background in Python, Django, React, PostgreSQL, Docker, and GCP gives me the range to do that. My recent Master's in Strategic Management in Software Engineering, completed in March 2026, has sharpened my ability to connect engineering decisions to the broader product and business strategy.

I would welcome a conversation about how my background can contribute to your team's current priorities. My portfolio is at mustaphaukizuru.com and my code at github.com/mustaphaukizuru. I am available to start immediately and I am authorized to work in Mexico without visa sponsorship.

Yours sincerely,

Mustapha Ukizuru

Full-Stack Software Engineer
