Work Authorization: Mexico, No Visa Sponsorship Required | Available: Immediately

PROFESSIONAL SUMMARY

Technical Support Engineer with over five years of international experience managing IT infrastructure, resolving complex technical incidents, and delivering reliable system performance across Mexico, Ethiopia, and Rwanda. Proven record of reducing infrastructure downtime by 30%, maintaining 99% uptime for 100-plus user environments, and resolving hardware, software, and network issues consistently within a two-hour standard. Skilled in TCP/IP networking, DNS, DHCP, VPN administration, Google Workspace, LMS platforms, Linux, Windows, and cloud infrastructure on GCP and AWS. Completed a Master's in Strategic Management in Software Engineering (March 2026). Quadrilingual professional authorized to work in Mexico immediately.

TECHNICAL SKILLS

Operating Systems: Linux (Ubuntu, CentOS), Windows Server, Windows 10/11, macOS
Networking: TCP/IP, DNS, DHCP, VPN configuration, LAN/WAN, Wi-Fi troubleshooting
Cloud and Infrastructure: Google Cloud Platform (GCP), AWS, Google Workspace administration
Support Tools: JIRA, Help Desk ticketing, remote desktop, system monitoring tools
Scripting and Automation: Python, Bash, JavaScript automation scripts and internal tooling
Databases: PostgreSQL, MySQL administration and query troubleshooting
Web Technologies: Django, React, HTML5, CSS3, RESTful APIs
Security: OWASP principles, VPN setup, access control, data protection protocols
Methodologies: Agile/Scrum, ITIL-aligned support practices, preventive maintenance

CORE COMPETENCIES

End-to-End Incident Resolution: Resolves hardware, software, and network issues end-to-end, minimizing downtime.
Infrastructure Reliability: Maintains high system uptime through monitoring and preventive maintenance.
Cross-Cultural Communication: Communicates technical concepts clearly to diverse, non-technical users.
Digital Transformation Support: Supports system migrations and digital platform adoption at scale.
Scripting and Automation: Automates tasks using Python and Bash to improve efficiency.

PROFESSIONAL EXPERIENCE

Technical Support Engineer and CS Educator

Dec 2022 to Present

Colegio de Excelencia Raindrop | Tlalnepantla de Baz, State of Mexico, Mexico

- Administered end-to-end technical support for hardware, software, and network systems across the entire campus, maintaining a consistent sub-two-hour issue resolution standard for over 100 users.
- Led a comprehensive network infrastructure upgrade covering TCP/IP, DNS, DHCP, and VPN systems, reducing operational downtime by over 30% and sustaining 99% uptime across all campus environments.
- Built and deployed internal automation tools and reporting dashboards using Python and JavaScript, eliminating manual administrative workflows across 12 departments and recovering significant staff hours each week.
- Integrated Google Workspace and Learning Management System platforms into daily academic operations, supporting onboarding and ongoing digital adoption for 40 faculty members.
- Optimized the school web infrastructure using Python and Google Cloud Platform, achieving a 40% improvement in website performance and page load speed for over 100 daily users.
- Designed and delivered the school Computer Science curriculum; mentored 10 students in Python, Java, and web development, with one project team advancing to the XIX InfoMatrix Ibero-American National Finals 2025 (SOLACYT).

Assistant Project Manager, Technical Systems

Sep 2021 to Sep 2022

Design Office of Africa Ltd. | Kigali, Rwanda

- Provided direct IT support and troubleshooting to internal teams across hardware, software, and network issues, resolving incidents promptly to prevent disruption to project delivery.

- Managed internal digital systems and IT infrastructure, maintaining 99% system uptime and ensuring data integrity across all operational platforms.
- Coordinated technical project timelines and delivery milestones across concurrent workstreams using JIRA, consistently meeting deadlines on time and within scope.
- Produced multilingual technical documentation in English, Turkish, and Kinyarwanda, ensuring clear communication across international stakeholder teams.

ICT Infrastructure Director and Technical Support Lead

Jan 2021 to Aug 2021

Intellectual Schools AC | Addis Ababa, Ethiopia

- Managed the full scope of IT support operations across a multi-building campus, covering hardware, software, and network systems for over 1,000 students and 60 faculty members, with an average issue resolution time of under two hours.
- Reduced system downtime by 30% by deploying proactive infrastructure monitoring, configuring automated alerts, and establishing scheduled preventive maintenance protocols.
- Redesigned the institutional web and backend infrastructure, achieving a 50% improvement in website performance through server-side optimization, database query tuning, and caching strategies.
- Supported hybrid e-learning adoption for over 1,000 students and 60 faculty via Google Workspace and LMS integrations, improving digital tool adoption by 60% in the first quarter.

Software Development Instructor and Curriculum Designer

Jan 2020 to Dec 2020

St. Emmanuel School Complex | Kigali, Rwanda

- Designed and delivered a full-cycle software development curriculum covering Python, Java, JavaScript, and web development, guiding students from programming fundamentals through to application deployment.
- Provided technical support and guidance to students on development environments, version control workflows, and debugging, reducing code integration errors by an estimated 35%.

Sales and Marketing Officer, Digital Systems

May 2020 to Dec 2020

Blueflame Ltd. | Kigali, Rwanda

- Generated a 25% increase in company revenue through a data-driven digital marketing strategy combining CRM automation, audience segmentation, and campaign performance analytics.
- Built HTML, CSS, and JavaScript email marketing campaigns that measurably improved customer conversion rates and audience engagement.

EDUCATION

MSc. Strategic Management in Software Engineering

Jun 2024 to Mar 2026

European University of the Atlantic (UNEATLANTICO) | Spain

B.Ed. in Information Technology (Minor: Accounting), with Distinction

Sep 2016 to Mar 2021

Adventist University of Central Africa (AUCA) | Kigali, Rwanda

Diploma in Turkish Language

Sep 2015 to Aug 2016

Ipek University | Ankara, Turkey

CERTIFICATIONS

- Technical Support Fundamentals, *Google via Coursera (2023)*
- System Administration and IT Infrastructure Services, *Google via Coursera (2023)*
- HTML, CSS, and JavaScript for Web Developers, *Johns Hopkins University via Coursera (2023)*
- Version Control with Git and GitHub, *Meta via Coursera (2023)*
- Python 101 for Data Science, *IBM Cognitive Class (2020)*
- SQL and Relational Databases 101, *IBM Cognitive Class (2020)*

April 15, 2026

Dear Hiring Manager,

In my current role, I maintain 99% uptime across a 100-plus user campus network running TCP/IP, DNS, DHCP, and VPN systems — while simultaneously resolving hardware, software, and connectivity incidents to a consistent sub-two-hour standard. That combination of infrastructure reliability and responsive user support is not accidental. It is the result of five years of hands-on technical support and IT operations work across three countries, and it is precisely the standard I bring to every environment I work in.

At Raindrop College of Excellence in Mexico, I rebuilt the campus network infrastructure from the ground up, reducing operational downtime by over 30% and supporting over 100 users across all systems daily. At Intellectual Schools AC in Ethiopia, I managed end-to-end IT support for a multi-building campus serving over 1,000 students and 60 faculty members, reduced system downtime by 30% through proactive monitoring and automated alerting, and led a digital transformation that improved platform adoption by 60% in the first quarter. In both environments, I was the single point of accountability for everything from server-side performance to a faculty member's device failing thirty minutes before class.

Beyond the technical depth, I bring a support profile that is genuinely uncommon: I am fluent in four languages English at C2 level, Spanish, Turkish, and Kinyarwanda and I have delivered technical support across cultural and institutional environments in Africa, the Middle East, and Latin America. Clear, patient communication with non-technical users is not a soft skill I list on a profile; it is something I practice daily. My Google certifications in Technical Support Fundamentals and System Administration and IT Infrastructure Services directly validate this focus, and my Master's in Strategic Management in Software Engineering (completed March 2026) gives me the broader systems perspective to improve support processes, not just respond to them.

I would welcome the opportunity to discuss how my technical support background and infrastructure experience can contribute to your team. I am authorized to work in Mexico immediately, without visa sponsorship, and available to start without delay. My portfolio is at mustaphaukizuru.com and my code at github.com/mustaphaukizuru.

Yours sincerely,

Mustapha Ukizuru

Technical Support Engineer
